-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address.

### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Art Unit: 3653

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1 through 7 and 9 are rejected under 35 U.S.C. 102(b) as being anticipated by Andriash.

See Figure 6. Note the slot 178 having a center portion and first and second end portions which is surrounded by outwardly projecting lips. Note also the faceplate 166 has a flat surface (the top wall of the faceplate) and a sloped portion (either of 174 or 176). Note also the push plate assembly 196 (or 200 as shown in Figure 8).

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to

Art Unit: 3653

consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

5. Claim 10 is rejected under 35 U.S.C. 103(a) as being unpatentable over Andriash.

Andriash as interpreted above in paragraph 2 teaches everything except the specific material from which the faceplate is constructed.

The faceplate constructed of metal is considered a matter of choice as it is within the ability of one having ordinary skill in the art to select a desired material from which to construct the faceplate.

6. Claim 8 is rejected under 35 U.S.C. 103(a) as being unpatentable over Christensen et al in view of Omdoll et al.

Christensen et al teaches a faceplate 24 having everything except a plurality of lips projecting outwardly from the slot adjacent the center portion.

Omdoll et al teaches providing a dispensing slot similar to that disclosed by Christensen et al with outwardly extending lips 38.

In view of the teachings of Omdoll et al, it would have been obvious to one of ordinary skill in the art to provide the slot of Christensen et al with outwardly extending lips at least adjacent the center portion of the slot.

7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to David H Bollinger whose telephone number is 703-308-1113. The examiner can normally be reached on Monday through Friday from 9:00 am to 5:00 pm.
